The package includes:

Tank

Radio controller

BB pellets

Infrared combating Transmitter(supporting multi-player tank war)

Infrared combating Receiver

Idle smoking generator

Smoke liquid (Maybe it can not be shipped to your country because of the shipping rule, just MAYBE, pls forgive it.)

1800mah Tank battery

USB universal Charger

Kits

English manual book(Don't rely on manual book, BECAUSE sometimes the book is wrong and outdated)

Metal Parts:

Barrel

Non Metal Parts:

Tank body

Driving Gearbox

Road wheels

Tracks

Sprockets and idler wheels

Main Features:

1,TK7.0 Infrared combating system supports many players to combat in a tank war.

2, Infrared Shooting System.

3, Scale appearance of real tank.

4, Pivot steering.

5, Like real tank firing. Shooting 6mm BB pellets with COOL hull-recoil action(hull recoil is not barrel recoil) and firing sound effect. Shooting range 20m.

6, Turret rotates almost 340 degrees.

7, Barrel moves up and down almost 30 degree.

8, Emulational tank lights of LED.

9, Idle Smoking like real tank from "engine", when tank runs fast the smoke gradually becomes more, but you need to drop liquid into the tank(EACH TIME ONLY DROP ONE DROP)(please note maybe we can not ship liquid to some countries).

10,2.4Ghz radio
