

RC 1941 JEEP WILLYS 4wd RTR Crawler Climbing Military Truck

In 1940, the American Willis Automobile Company developed a multi-purpose Off road vehicle. The car has 60P horsepower, 590KG of self weight and 300KG Of payload. At the same time, it was equipped with a four-wheel drive system, Which was three times the power of similar cars at the time. This vehicle is fast and light in weight, and easy to transport. It was mainly used to transport light weapons equipped by infantry battalion, and cab be used as a communications reconnaissance And command vehicle.

Product Information:

Description:

Basic information	Brand:JJRC Item No:C8815 Color:Army green Max Speed:6km/h	Power System	Motor:280 brushed motor Servo:17g digital steering servo
-------------------	--	--------------	---

Transmitter	Frequency:2.4 G Channel:4CH Remote Distance:About 50m Required Battery:2X AA battery(not included)	Battery	Car Battery:7.4V 500mAh Li-ion battery(included) Battery Charging Time:About 180 minutes Battery Playing Time:Approx.40 minutes
Other	Material:ABS plastic+electro nic parts Box Weight:About 1300g	Dimensi on	Car Size:34*15.7*17. 3cm Box Size:38.5*18.8*1 9.9cm

Features:

1. A realistic model car with very accurate details, which continues the simulation details of Willys in appearance;
2. LED headlights, LED taillights, turn signals, and searchlights can be independently controlled;
3. The electric board is reserved for the installation of upgraded winch functions, and the canopy can be upgraded(winch and canopy is optional chosen by yourself);
4. The steering wheel is linked, the steering wheel of the body, and the steering is synchronized with the wheels, which is extremely realistic;

5. Highly simulated, supports outdoor control and collection by enthusiasts;
6. Simulated chassis, the bottom material texture is clear, and the bottom details are made in proportion to the real car;
7. Simulated front windshield, which can be lifted or matched as the player likes, can be made into different shapes, rearview mirrors, independent seats, enthusiasts can replace other mood parts according to their preferences, instrument panel, cockpit details interior, vivid, simulated hood, free opening and closing, and increase playability;
8. There are painting shovels, axes, fuel tanks and spare tires on the left side of the car, which can be removed (or are all removable items), highly restore the details of the real car, and add more interactive experience.

Note:

The standard configuration of the remote control vehicle does not include a canvas cover and a winch. Package included:

1X RC Car

1X Battery

1X Transmitter

1X Manual

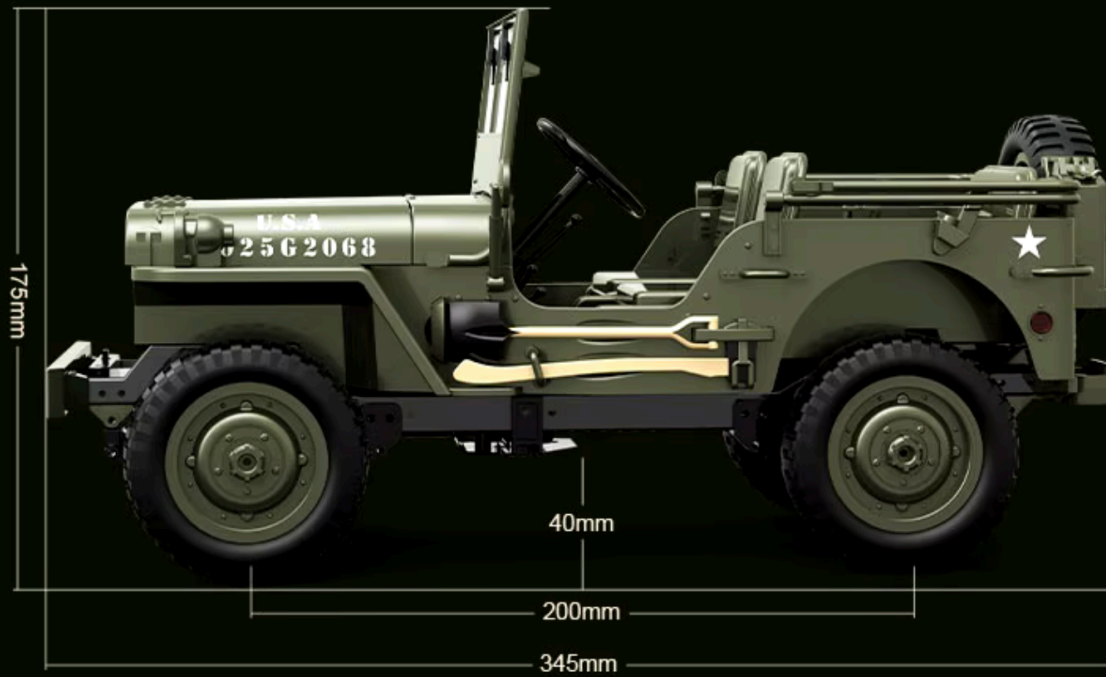

1X USB Charging Cable
